## UW-Madison/Extension Plant Disease Diagnostic Clinic (PDDC) Update

Brian Hudelson, Sue Lueloff and Ann Joy

The PDDC receives samples of many plant and soil samples from around the state. The following diseases/disorders have been identified at the PDDC from March 2, 2019 through March 8, 2019.

| PLANT/SAMPLE TYPE      | DISEASE/DISORDER                   | PATHOGEN  | COUNTY                             |
|------------------------|------------------------------------|---|------------------------------------|
| <b>VEGETABLE CROPS</b> |                                    |   |                                    |
| Cabbage                | Black Speck<br>Black Spot          | None<br><i>Alternaria</i> sp.                               | Okeechobee (FL)<br>Okeechobee (FL) |
| Potato                 | <a href="#">Bacterial Soft Rot</a> | <i>Pectobacterium carotovorum</i> subsp. <i>carotovorum</i> | Langlade                           |

For additional information on plant diseases and their control, visit the PDDC website at [pddc.wisc.edu](http://pddc.wisc.edu). Follow the clinic on Facebook and Twitter @UWPDDC.
