## UW-Madison/Extension Plant Disease Diagnostic Clinic (PDDC) Update

Brian Hudelson, Sue Lueloff and Ann Joy

In 2021, the PDDC continues with limited hours and limited sample processing capacity due to COVID-19. [Click here](#) for the PDDC's current submission policy. The PDDC is continuing to provide diagnoses through examination of digital photographs, although in 2021 there will be a **fee** for this service. As in 2020, digital diagnoses will be included in the Wisconsin Disease Almanac. For Almanac entries below, when a digital diagnosis would normally require a lab confirmation, the disease/disorder will be labeled as "suspected". The following diseases/disorders have been identified at the PDDC from December 18, 2021 through December 24, 2021.

PLANT/SAMPLE TYPE	DISEASE/DISORDER	PATHOGEN	COUNTY
<b>BROAD-LEAFED WOODY ORNAMENTALS</b>			
Buckthorn	Diplodia Canker Sphaeropsis Canker <a href="#">Tubercularia/Nectria Canker</a>	<i>Diplodia</i> sp. <i>Sphaeropsis</i> sp. <i>Tubercularia/Nectria</i> sp.	Rock Rock Rock
<b>FRUIT CROPS</b>			
Strawberry	Fertility Issues (Suspected)	None	Jefferson
<b>NEELED WOODY ORNAMENTALS</b>			
Pine (White)	Canker Disease (Suspected)	Unspecified canker fungus	La Crosse

To learn more about plant diseases and their control, as well as PDDC educational resources and activities, visit the PDDC website at [pddc.wisc.edu](http://pddc.wisc.edu), follow the clinic on Facebook and Twitter @UWPDDC or email [pddc@wisc.edu](mailto:pddc@wisc.edu) to subscribe to the PDDC listserv "UWPDDCLearn".
