

## 2023 PDDC Plant Disease Talks

### Vegetable Diseases

Brian D. Hudelson  
Department of Plant Pathology  
University of Wisconsin-Madison/Extension

## Vegetable Diseases Fungal Leaf Blights

- Pathogens
  - *Septoria lycopersici* (Septoria leaf spot)
  - *Alternaria solani* (early blight)
  - *Phytophthora infestans* (late blight)
- Hosts
  - Tomato
  - Potato (early blight, late blight)
- Favorable environment: Cool, wet weather

## Vegetable Diseases Fungal Leaf Blights

- Control (early blight, Septoria leaf spot)
  - Remove and destroy contaminated debris
    - Burn (where allowed)
    - Deep bury
    - Hot compost
  - Move tomatoes to new location

## Vegetable Diseases Fungal Leaf Blights

- Control (early blight, Septoria leaf spot)
  - Plant resistant varieties
  - Space plants far apart
  - Mulch around the base of plants
  - DO NOT overmulch

### Vegetable Diseases Fungal Leaf Blights

- **Control (early blight, Septoria leaf spot)**
  - DO NOT overhead water
  - Thin plants as they grow
  - Use fungicides to prevent infections
    - Chlorothalonil, mancozeb
    - Copper
    - Alternate active ingredients (FRAC codes)
    - Apply at 7-14 days intervals

### Vegetable Diseases Fungal Leaf Blights

- **Control (late blight)**
  - Remove any infected plants and plant parts
    - Infected tomato/potato plants including fruits and tubers
    - Volunteer tomato and potato plants
    - Weed hosts
  - Destroy any infected plants and plant parts
    - Burn (where allowed)
    - Double bag and landfill

### Vegetable Diseases Fungal Leaf Blights

- **Control (late blight)**
  - DO NOT use last year's potatoes as seed
  - DO use certified seed potatoes
  - Grow resistant tomato varieties
    - "Late Blight Management in Tomato with Resistant Varieties"  
(<https://eorganic.org/node/10822>)

### Vegetable Diseases Fungal Leaf Blights

- **Control (late blight)**
  - Use fungicides to prevent infections
    - Chlorothalonil, mancozeb
    - Copper
    - Alternate active ingredients (FRAC codes)
    - Start applications based on Blitecast  
(<https://wisconsinpotatoes.com/blog-news/>)
    - Apply at 7-14 day intervals

### Vegetable Diseases Blossom End Rot

- **Cause: Calcium deficiency**
- **Affected plants**
  - Tomato
  - Pepper
  - Eggplant
  - Cucurbits  
(cucumber, squash, pumpkin, watermelon)
- **Favorable Environment: Drought**

## Vegetable Diseases Blossom End Rot

- **Management**
  - Test soil to determine calcium level
  - Add calcium as needed
    - Bone meal
    - Egg shells
    - NOT lime (usually)
  - Water plants adequately and uniformly

## Vegetable Diseases Walnut Toxicity

- **Cause: Juglones**
  - Black walnut
  - Butternut
  - Hickory
- **Affected plants**
  - Many vegetables
  - Tomato, potato, pepper, eggplant
  - Asparagus, cabbage

## Vegetable Diseases Walnut Toxicity

- **Management**
  - DO NOT plant sensitive vegetables near walnut trees
  - Plant tolerant vegetables
    - Beans
    - Beet
    - Carrot
    - Corn
    - Melon
    - Onion
    - Parsnip
    - Squash
  - Plant sensitive vegetables
    - in raised beds
    - in pots

## Vegetable Diseases Walnut Toxicity

- **Management**
  - Keep walnut leaves and fruits out of your garden
  - DO NOT compost walnut leaves and fruits
  - Remove volunteer walnut trees
  - Remove mature walnut trees (?)

## Vegetable Diseases Vascular Wilts

- **Pathogens**
  - *Verticillium* spp. (Verticillium wilt)
  - *Fusarium oxysporum* (Fusarium wilt)
- **Hosts**
  - Solanaceous vegetables (tomato, potato, pepper, eggplant)
  - Cucurbits (pumpkin, squash, cucumber, watermelon)

## Vegetable Diseases Vascular Wilts

- Favorable environment
  - Wet weather (for infection)
  - Dry weather (for symptom development)

## Vegetable Diseases Vascular Wilts

- Control
  - Rotate crops to avoid pathogen build-up
    - DO NOT plant susceptible vegetables in infested areas
    - Plant non-hosts in infested areas
  - Plant resistant varieties (VFF)
  - DO NOT overwater
  - DO NOT overmulch
  - DO NOT use fungicides or biological controls

## Vegetable Diseases Herbicide Injury

- Causes
  - Growth regulator herbicides
    - 2,4-D
    - Dicamba
  - Other herbicides
- Affected plants
  - All vegetables
  - Tomatoes

## Vegetable Diseases Herbicide Injury

- Management
  - DO NOT use herbicides
  - If you or your neighbors do use herbicides, make sure that you or they
    - Follow application directions exactly
    - Apply herbicides at low wind speeds (< 5 mph)
    - DO NOT apply herbicides too close to sensitive plants
    - Apply herbicides at low pressure
    - Use amine rather than ester forms of herbicides

## Vegetable Diseases Powdery Mildew

- **Pathogens**
  - Miscellaneous powdery mildew fungi
  - *Oidium* spp.
- **Hosts**
  - Cucurbits (cucumber, squash, pumpkin)
  - Other vegetables (pea, tomato)
- **Favorable environment: High humidity**

## Vegetable Diseases Powdery Mildew

- **Control**
  - Remove and destroy plant debris
    - Burn (where allowed)
    - Deep bury
    - Hot compost
  - Reduce humidity
    - Plant less densely/thin existing stands
    - Grow vining plants on a trellis
  - Use resistant cultivars/varieties

## Vegetable Diseases Powdery Mildew

- **Control**
  - Use fungicides to prevent infections
    - Dithiocarbamates, myclobutanil, propiconazole, tebuconazole, thiophanate-methyl
    - Sulfur, neem oil, other plant-based oils
    - 1.5 Tbsp baking soda + 3 Tbsp light-weight horticultural oil in 1 gal water
    - Alternate active ingredients (FRAC codes)
    - Apply when humidity is >60-70%
    - Apply every 7-14 days

## Vegetable Diseases Black Rot

- **Pathogen: *Xanthomonas campestris* pv. *campestris***
- **Hosts: Crucifers**
  - Brussels sprouts, cabbage, collards
  - Broccoli, cauliflower, kale, kohlrabi, rutabaga, turnips
- **Favorable environment: Wet weather**

## Vegetable Diseases Black Rot

- **Control**
  - Buy high quality (certified pathogen-free) seed or transplants
  - Heat treat seeds
    - 35 min, 122°F (Brussels sprouts, cabbage, collards)
    - 20 min, 122°F (broccoli, cauliflower, kale, kohlrabi, rutabaga, turnips)

## Vegetable Diseases Black Rot

- **Control**
  - Routinely rotate crops
    - DO NOT grow host plants in an infested areas
    - Plant non-hosts in infested areas
  - Fertilize properly (particularly nitrogen)
  - DO NOT overhead water
  - DO NOT handle plants when wet

## Vegetable Diseases Black Rot

- **Control**
  - Remove and dispose of contaminated plants
    - Burn (where allowed)
    - Deep bury
    - Hot compost
  - Decontaminate infested items (70% alcohol, disinfectants, bleach)

## Vegetable Diseases Black Rot

- **Control**
  - Use bactericides to prevent infections
    - Copper
    - Apply at 7-14 days intervals
    - Tolerant bacterial strains are a problem

## Vegetable Diseases Common Scab

- **Pathogen:** *Streptomyces scabies*
- **Hosts**
  - Potato
  - Carrot
  - Other root crops
- **Favorable environment:** High soil pH

## Vegetable Diseases Common Scab

- **Control**
  - Plant scab-free potato stock
  - Routinely rotate crops
    - DO NOT grow host plants in an infested areas
    - Plant non-hosts in infested areas
  - Move potatoes to another location
  - Plant scab resistant varieties
  - Lower soil pH
  - DO NOT use chemical or biological controls

## Vegetable Diseases Aster Yellows

- **Pathogen:** Aster yellows phytoplasma
- **Hosts**
  - Carrot
  - Potato
  - Other vegetables
- **Favorable environment:** None
- **Transmission:** Aster leafhopper

## Vegetable Diseases Aster Yellows

- **Control**
  - Remove diseased plant material and debris
    - Hot compost
    - Bury
    - Burn (where allowed)
  - Control leafhopper vector (?)

## Vegetable Diseases Common Smut

- **Pathogen:** *Ustilago maydis*
- **Host:** Sweet corn
- **Favorable environment**
  - None (ear infections)
  - Hail (leaf and stalk infections)

**Vegetable Diseases**  
**Common Smut**

- **Control**
  - Plant resistant varieties
  - Reduce physical damage to corn plants
  - **DO NOT** use chemical or biological controls
  - Give up on your corn and eat the smut (huitlacoche)

**Vegetable Diseases**  
**Where to Go for Help**

Plant Disease Diagnostics Clinic  
Department of Plant Pathology  
University of Wisconsin-Madison  
1630 Linden Drive  
Madison, WI 53706-1598
